

Ruby

THE PLEASURE
OF A GOOD COFFEE

GAGGIA
MILANO

THE STORY OF ONE OF THE WORLD'S MOST ICONIC ITALIAN BRANDS BEGAN IN 1930'S MILAN.

In 1938, barista Achille Gaggia filed the patent that signalled a revolution in the way aromas are extracted from coffee. Gaggia had created, for the very first time, the perfect Italian espresso - complete with its characteristic 'crema'.

Gaggia's mission today is the same as it's always been: to share authentic Italian espresso with the world. The company's intrinsic values of tradition and professionalism are self-evident throughout its product range, which has been designed to meet the requirements of coffee professionals by combining state-of-the-art technology with sophisticated design.

FOR MEDIUM AND SMALL LOCATIONS

Designed to respond specifically to the demand typical of medium-small locations, Ruby is the compact and essential professional coffee machine that guarantees excellent in-cup quality.

While Ruby and Ruby Pro are primarily addressed to service areas, small dining rooms and offices, the 2-group version perfectly suits to quite large spaces with high coffee consumption volumes: in fact, it can serve up to four cups of coffee at the same time.

Thanks to specific filter holder kits that are available on request, Ruby can work with professional filter holders for ground coffee, capsules and ESE paper pods.

ACCORDING TO YOUR NEEDS

Will an internal tank satisfy your requirements, or will you need to connect to the mains? Up to you to opt for the solution that best suits your needs.

In both cases, the exclusive Espresso Priority System allows the preparation of your cup even if the water tank is at minimum level, or the boiler needs refilling after a hot water dispensing or the steam wand being activated.

Moreover, in case you opt for the embedded water tank version, you can also benefit from easy access for filling the water tank and easy removal of the drip tray for cleaning.
